```java
import java.io.*;

public class question66
{
    String str="";
    String rev="";

    void getstr()throws IOException
    {
        InputStreamReader read=new InputStreamReader(System.in);
        BufferedReader in=new BufferedReader(read);

        System.out.print("Enter the string -> ");
        str=in.readLine();
    }

    void reverse()
    {
        for(int i=str.length()-1;i>=0;i--)
        {
            System.out.print(str.charAt(i));
        }
    }

    public static void main(String args[])throws IOException
    {
        question66 ob=new question66();
        ob.getstr();
        ob.reverse();
    }
}
```
