```java
import java.io.*;

public class question65
{
    int a;
    int b;

    void input()throws IOException
    {
        InputStreamReader read=new InputStreamReader(System.in);
        BufferedReader in=new BufferedReader(read);

        System.out.print("Enter the first number -> ");
        a=Integer.parseInt(in.readLine());
        System.out.print("Enter the second number -> ");
        b=Integer.parseInt(in.readLine());
    }

    void calculate()
    {
        int sum=a+b;
        display(sum);
    }

    void display(int sum)
    {
        System.out.println("The sum of "+a+" and "+b+" is "+sum);
    }

    public static void main(String args[])throws IOException
    {
        question65 ob=new question65();
        ob.input();
        ob.calculate();
    }
}
```
